

# Tesla, Inc.

Ticker: TSLA | FY 2025 (ended Dec 31, 2025)

Industry: Motor Vehicles & Passenger Car Bodies | Source: U.S. Securities and Exchange Commission EDGAR

**DISCLAIMER:** This document is a summary of publicly available SEC EDGAR filing data for informational and educational purposes only. It is not investment advice.

## 1. Business Overview

Tesla, Inc. designs, develops, manufactures, leases, and sells electric vehicles, energy generation and storage systems, and related services. Tesla's vehicle lineup includes the Model S, Model 3, Model X, Model Y, Cybertruck, and Semi. The Company also develops and sells solar panels, Solar Roof tiles, Powerwall, Powerpack, and Megapack energy storage products.

Tesla operates manufacturing facilities (Gigafactories) in the United States (Nevada, Texas, California), Germany (Berlin-Brandenburg), and China (Shanghai). The Company sells vehicles directly to consumers through its website and showrooms, bypassing traditional dealerships. Tesla also provides vehicle service through its service centers and mobile service fleet, and operates the Tesla Supercharger network—the world's largest fast-charging network for electric vehicles.

## 2. Financial Highlights

Key financial metrics sourced from SEC EDGAR XBRL structured data.

| Metric                       | Value    | Period     |
|------------------------------|----------|------------|
| Revenues                     | \$94.8B  | 2025-12-31 |
| Net Income                   | \$3.8B   | 2025-12-31 |
| Gross Profit                 | \$17.1B  | 2025-12-31 |
| Operating Income             | \$4.4B   | 2025-12-31 |
| Total Assets                 | \$137.8B | 2025-12-31 |
| Total Liabilities            | \$54.9B  | 2025-12-31 |
| Stockholders' Equity         | \$82.1B  | 2025-12-31 |
| Cash & Equivalents           | \$16.5B  | 2025-12-31 |
| R&D Expense                  | \$6.4B   | 2025-12-31 |
| Capital Expenditures         | \$8.5B   | 2025-12-31 |
| Earnings Per Share (Diluted) | \$1.08   | 2025-12-31 |
| Shares Outstanding (Diluted) | 3.75B    | 2025-12-31 |

|             |                                                                  |
|-------------|------------------------------------------------------------------|
| Share Count | Approximately 3.2 billion shares outstanding as of December 2025 |
| Employees   | 125,665 full-time employees globally                             |

|                          |                                                                              |
|--------------------------|------------------------------------------------------------------------------|
| <b>Dividends</b>         | Tesla has not paid any cash dividends and does not expect to do so           |
| <b>Share Repurchases</b> | No significant share repurchase program in place                             |
| <b>Guidance Policy</b>   | Tesla provides annual delivery growth targets rather than financial guidance |

### 3. Management's Discussion & Analysis (MD&A) — Summary

During fiscal 2025, Tesla delivered record numbers of vehicles globally. The Model Y remained the world's best-selling passenger vehicle. The Cybertruck continued its ramp in production and deliveries in North America, while Tesla expanded its global footprint across markets in Europe and Asia.

Automotive gross margin faced pressure from price reductions implemented to drive demand, though continued manufacturing efficiency gains and declining battery costs partially offset this impact. The Energy Generation and Storage segment achieved record deployments of Megapack and Powerwall, with strong gross margins contributing meaningfully to profitability.

Services and Other revenue grew, driven by the expanding fleet of vehicles on the road and growth in Tesla's non-warranty after-sales services. The Full Self-Driving (FSD) software subscription and one-time purchase revenue grew as FSD capability improved. Supercharging revenue also increased as Tesla opened its network to non-Tesla EVs in key markets including the United States and Europe.

### 4. Key Risk Factors

The following represent selected material risks disclosed in the Company's annual 10-K filing. This is not an exhaustive list.

- Competition from established automakers and new EV entrants globally
- Execution risks in manufacturing ramp and new product introductions
- Demand uncertainty for EVs and sensitivity to incentive/subsidy programs
- Concentrated manufacturing creating supply chain risks
- Regulatory and safety concerns related to Autopilot/FSD technology
- Dependence on key personnel, particularly the CEO
- Commodity price fluctuations (lithium, cobalt, nickel, steel)
- Warranty and product liability exposure
- International operations risks including China trade tensions

### 5. Business Segments

| Segment            | Description                                                     |
|--------------------|-----------------------------------------------------------------|
| Automotive Sales   | Revenue from vehicle sales: Model 3, Y, S, X, Cybertruck, Semi. |
| Automotive Leasing | Operating leases for Tesla vehicles.                            |
| Services & Other   | Non-warranty after-sales, Supercharging, body shop, insurance.  |

|                             |                                                                  |
|-----------------------------|------------------------------------------------------------------|
| Full Self-Driving (FSD)     | FSD software subscriptions and one-time purchase revenue.        |
| Energy Generation & Storage | Powerwall (residential), Megapack (utility), Solar Roof, panels. |
